

```
# =====  
# BUG 1 - RUNTIME ERROR  
# Type : ZeroDivisionError  
# Cause : Dividing by zero while calculating average  
# Fix : Divide by the actual number of marks  
# =====  
  
# BUGGY CODE:  
marks = [78, 85, 90, 67, 88]  
  
total = sum(marks)  
  
# average = total / 0 # Runtime Error: ZeroDivisionError  
  
# FIXED CODE:  
average = total / len(marks)  
  
print("Total Marks =", total)  
print("Average Marks =", average)  
  
# =====  
# BUG 2 - LOGICAL ERROR  
# Type : Logical Error  
# Cause : Highest and Lowest marks calculated incorrectly  
# Fix : Use max() and min() functions  
# =====
```

```
# highest = min(marks)    # Wrong logic
# lowest = max(marks)     # Wrong logic

# FIXED CODE:
highest = max(marks)
lowest = min(marks)

print("Highest Marks =", highest)
print("Lowest Marks =", lowest)

# =====
# FINAL CORRECT PROGRAM
# =====

marks = []

print("Enter marks of 5 students:")

for i in range(5):
    mark = int(input(f"Student {i+1}: "))
    marks.append(mark)

total = sum(marks)
average = total / len(marks)
highest = max(marks)
lowest = min(marks)

--

total = sum(marks)
average = total / len(marks)
highest = max(marks)
lowest = min(marks)

print("\n----- RESULT -----")
print("Total Marks      :", total)
print("Average Marks    :", average)
print("Highest Marks     :", highest)
print("Lowest Marks      :", lowest)
